PROFESSIONAL SUMMARY

Senior Unity Developer with 4+ years of professional experience building and shipping scalable gameplay systems, real-time PvP multiplayer, and performance-optimized mobile games across 3 studios. Led development of Photon Fusion-based multiplayer infrastructure, reduced crash rates by ~35% on low-end Android devices, and published 9+ titles to Google Play and App Store. Proven expertise in C#, OOP, design patterns, AI systems, Agile/Scrum delivery, and live-ops. Equally strong in technical leadership, code architecture, mobile optimization, and cross-functional team collaboration. Seeking a Senior or Lead Unity Developer role to own gameplay systems end-to-end.

KEY ACHIEVEMENTS

- Reduced mobile crash rate by ~35% through memory profiling, GC spike elimination, and runtime optimization on low-end Android devices
- Led multiplayer module for real-time PvP game using Photon Fusion — built matchmaking, lag compensation, and state synchronization from scratch
- Published 9+ games to Google Play & App Store across 3 studios spanning FPS, simulation, horror, racing, and multiplayer genres
- Mentored 2 junior Unity developers at Cross Code and contributed core architectural decisions within an 8-person engineering team
- Achieved stable 60fps performance on mid-range Android devices through LOD, object pooling, and rendering pipeline optimization
- Integrated full monetization pipelines (Unity Ads, AdMob, IAP) across 3+ hyper-casual titles at Gamivision

CORE TECHNICAL SKILLS

Game Engine	Unity 3D/2D (5+ years), C#, OOP, SOLID Principles, Design Patterns, ScriptableObjects
Gameplay Systems	State Machines, AI Behavior Trees, NavMesh, Procedural Generation, Physics Systems
Multiplayer	Photon Fusion, Photon PUN, Mirror, Real-time Sync, Lag Compensation, Matchmaking, PvP
Performance	Memory Optimization, GC Profiling, Object Pooling, LOD, Draw Call Batching, Mobile Optimization
Graphics & UI	URP, HDRP, Shader Graph, Unity UI Toolkit, UGUI, DOTween, Particle Systems
AR / VR	Unity XR Toolkit, Immersive Environments, 360° Navigation, VR Interaction Design
Tools & Workflow	Git, GitHub, Agile, Scrum, Jira, CI/CD, Unity Cloud Build
Additional	Flutter, JavaScript, Node.js, REST APIs, Firebase, Google Play Console, App Store Connect

PROFESSIONAL EXPERIENCE

Unity Game Developer | Skill Knight Studios | Lahore, Pakistan (On-site) *March 2025 – Present*

- Technical lead for real-time PvP multiplayer module using Photon Fusion — architected matchmaking, lag compensation, and authoritative state synchronization for concurrent player sessions
- Reduced average frame time by 30% on mid-range Android devices through rendering pipeline optimization, texture compression, and draw call batching
- Built live-ops backend systems: dynamic in-game events, achievement engine, and real-time leaderboards integrated with server-side validation

- Coordinated feature delivery with 2 client-side developers and 1 backend engineer using Agile sprints in Jira
- Implemented player synchronization systems ensuring consistent game state across clients with <100ms latency tolerance

Unity Game Developer | **Gamivision** | Lahore, Pakistan (On-site) *Aug 2024 – Feb 2025*

- Developed core gameplay loops for 3+ hyper-casual mobile titles from prototype to App Store and Google Play release
- Integrated Unity Ads, AdMob, and IAP monetization pipelines — contributed to ad revenue stream across live titles
- Diagnosed memory leaks and GC allocation spikes using Unity Profiler; reduced crash rate by ~35% on devices with less than 2GB RAM
- Optimized asset bundles and texture atlases reducing initial load time by ~25% on low-end devices
- Worked in 2-week Agile sprints, delivering features on schedule in a team of 5 developers

Unity Game Developer | **Cross Code** | Lahore, Pakistan (On-site) *Jan 2022 – July 2024*

- Designed and built AI systems using finite state machines and NavMesh pathfinding for enemy behavior in FPS, horror, and simulation genres
- Developed multiplayer components and real-time player synchronization using Photon PUN for mobile and PC titles
- Published 4+ games to Google Play and App Store, managing end-to-end build pipeline, signing, and store submission
- Contributed to system architecture decisions and conducted code reviews in a cross-functional Agile team of 8 engineers
- Mentored 2 junior developers: conducted code reviews, defined coding standards, and guided feature implementation

Unity Developer Intern | **Cross Code** | Lahore, Pakistan (On-site) *Nov 2021 – Dec 2021*

- Assisted in building gameplay features and resolving bugs across mobile and PC Unity projects
- Onboarded into production Agile workflow: daily standups, sprint planning, Git branching strategy, and peer code reviews

SHIPPED GAME PROJECTS

<u>Ludo – Board & Card Games</u>	Turn-based multiplayer with rule engine, AI opponents, real-time sync, and scalable mobile UI [iOS · Android]
<u>Deer Hunter (3D FPS)</u>	NavMesh AI, state-machine enemy behavior, shooting mechanics in open-world environment [iOS · Android]
<u>Ball Escape (2D Puzzle)</u>	Physics-based puzzle mechanics, level progression system, and responsive UI [iOS · Android]
<u>Scarface Horror (3D)</u>	Lighting/sound-driven horror, trigger-based event system, enemy AI interactions [iOS · Android]
<u>Cooking Empire (2D)</u>	Time-based gameplay, UI-heavy progression, player upgrade and retention mechanics [iOS · Android]
<u>Party Life Simulator (3D)</u>	Open-world simulation, NPC interaction systems, player-driven exploration [iOS · Android]
<u>Jeep Racing Game (3D)</u>	Custom vehicle physics, terrain gameplay, mobile performance optimization [iOS · Android]
<u>Lilly Darkroom Horror (3D)</u>	Immersive horror, environment storytelling, AI enemy patrol, event-driven gameplay [PC · Mobile]
<u>Cat Simulator (3D)</u>	Third-person controller, animation state machine, physics-based environment interactions [PC · Mobile]

PERSONAL & R&D PROJECTS

- Procedural Dungeon Generator — Perlin noise-based level generation with configurable room templates, corridor logic, and difficulty scaling | Unity C# | GitHub: [zubairali001.github.io](https://github.com/zubairali001)
- VR Tourism Experience — Unity XR Toolkit immersive environment with 360° navigation, spatial audio, and teleportation locomotion | Unity + Oculus SDK
- Analytics Dashboard — Real-time Unity gameplay metrics dashboard with event tracking, session data, and Node.js REST API backend | Unity + Node.js + REST

CERTIFICATIONS

Unity Certified Programmer	Unity Technologies	2025
Unity AR/VR Developer Pathway	Unity Learn	2024
C# Programming for Game Development	Coursera	2023
Agile Development Specialization	Coursera	2023

EDUCATION

Bachelor of Computer Science (BSCS)

COMSATS University Islamabad, Lahore Campus

LANGUAGES & COLLABORATION

Languages: English (Fluent), Urdu (Native)

Collaboration: Async communication, distributed Agile teams, remote-ready
